Contesting for the post of  
Executive Committee Member

Dear CCI Members,  
Warm Greetings !

Cricket Club of India is a living history of the glorious moments of multiple sporting activities. It is a matter of pride for all of us for being associated with this magnificent institution and it is our obligation to keep the glory of this club in high esteem with dignity and decorum.

I am grateful to all fellow members who gave me an opportunity to serve the club and its members as an Executive Committee Member from 2013 to 2022. During my earlier stint, I was fortunate to get opportunities to work on multiple areas of management, be it Treasury, Estate Matters, resolution of complex legal issues, dealing with multitude of Govt. agencies, as well as planning and execution of mega cricket events such as IPL in 2014, 2015 and 2022.

My appeal for your support to my candidature this year is with the belief that once again you will give me an opportunity to serve the club and its members.

My firm belief is that mere improved efficiency or even effectiveness in dealing with day to day issues is not enough. As a custodian of members' trust as well as the club resources, it must be our bounden duty to prepare the club to meet aspirations of younger generations and excel in future challenges while optimizing the resources in most prudent and transparent manner.

My endeavour will be to accelerate planning and execution of master plan so that we arrive at a resolution of enhancing the parking and sports facilities, which is the need of the hour.

Our illustrious predecessors have worked hard and left us a legacy of great institution. We need to reflect that whether we should just be content with preserving and maintaining the legacy or make a truly sincere and honest attempt to take the club to greater heights and leave behind much more for our future generations than what we inherited.

My honest endeavour as member of the Executive Committee, if elected, would be to work diligently to promote these ideals.

“Continuous Improvement is better than Delayed Perfection”

Warm Regards,  
Yours Sincerely,  
Suresh Bafna
